Liberals: The Real Danger to Free Speech

Free speech is under attack from liberal groups who want to silence all opposition. To liberal progressives, free speech in our nation is a “problem” that needs to be fixed, and if the liberals get their way, it will. At the rate we are going on issues concerning free speech, there will be no tolerance by liberals of any viewpoint different from their own. Disagreements will be redefined as “hate” speech, and will be punished with jail.

The dismantling of free speech by liberals has reached college campuses.

The systematic dismantling of free speech by liberals in government has even reached our college campuses. Long considered as places where the robust exchange of ideas was encouraged, college campuses are now governed by written “civility” and “speech” codes. On many campuses, Christian viewpoints and speech are banned as being violations of speech and civility codes. This is a reality—thanks to liberal progressive politics.

Civility and speech codes take many forms, but in my law practice I see that the civility and speech codes are used primarily to suppress Christian evangelism on public university campuses.

Specifically, it is Christian speech from the Bible that is being attacked by the liberal university policies that promote the gay, lesbian, bisexual, and transgender (GLBT) groups. These groups demand tolerance of their viewpoint (and they get it), while they demand that the university administrators not tolerate any opposing viewpoint (which they also get).

I am frequently called upon to defend Christian evangelists who try to minister to GLBT groups on public university campuses. Most recently I was called to defend Christians at Kutztown University. The charge was disorderly conduct—and not because the Christians were acting disorderly, but because the GLBT community, during their “Day of Silence,” began cursing at and threatening the Christians for having signs and handing out tracts with Biblical passages. The Christians were arrested because their speech/viewpoint incited a “riotous” crowd. In the law we call that a heckler’s veto, a term that is synonymous with government censorship, which is always unconstitutional.

The defendants in this case appeared in the Fleetwood Magisterial District Court to challenge the disorderly conduct charges. The university police readily admitted the defendants were not disorderly, but they had to be arrested as a result of their refusal to move off campus because the GLBT group was upset.

On the Issue

The College Bookstore offers hundreds of books with conservative viewpoints on contemporary issues. For further reading on the silencing of free speech, consider the following titles.

Persecution
David Limbaugh
\$21.15

The Death of Truth
Dennis McCallum
\$18.60

The university, because of its own “civility” code, deemed the Christian speech to be offensive to the GLBT group, and used that as a basis to censor the Christians by arresting them and putting them in jail.

At the conclusion of the trial, the judge was educated on the applicable First Amendment case law. The judge stated that she couldn’t find the defendants guilty, and that she also could not find them “not guilty.”

On many campuses, Christian viewpoints and speech are banned.

Instead of following the law and declaring the defendants not guilty as a result of the utter failure of the Commonwealth of Pennsylvania to prove the defendants guilty beyond a reasonable doubt, the judge chastised the defendants for engaging in expressive activity without notifying the university in advance that they would be on campus. What she failed to acknowledge, however, was the constitutional right of the defendants to express their contrary viewpoints. I am not making this up.

I have often been accused of being a conservative, but no one has ever accused me of running from a fight. This is a fight, especially when governing bodies and university campuses censor speech, and judges sanctify this censorship.

New hate-crime legislation (i.e. Matthew Shephard Hate Crimes Legislation) which protects the GLBT groups will certainly make Christians the targets of many more arrests, and not for acting illegally, but for having a viewpoint that is considered by liberal progressives to be hate. Europe is already criminalizing “thoughts” and “viewpoints.”

I know there will be at least one liberal who will read this and be “offended,” and I am extending a challenge to you. In terms of beliefs, do you want our Judeo-Christian values (Biblical worldview) to be replaced with your liberal-progressive (secular-worldview) policies? If yes, describe what our nation’s “new” values will consist of.

For everyone else, when Islam is attacking western civilization (Christianity), who will you trust with our nation’s security, liberal progressives or conservatives? ■

From the President

Dr. Arlin Horton,
Founder/President

Leaders of Men or Servants of Christ?

Leadership... We hear much about it today. Everyone attempts to define it to produce more leaders. But is “producing leaders” the biblical mandate of a Christian ministry?

A PCC graduate gave this testimony in a ministerial class: “Though I had pressures to go to other Christian institutions, I felt God wanted me at PCC. Now I know why. Other institutions train students to be leaders of men—**PCC trains us to be servants of Christ.**”

We believe there is something more important at PCC than being a leader, namely, being a **servant**. Christ said, “Let him that is greatest of all be **servant** of all.”

It has never been PCC’s objective to be the leader of Christian institutions. Our goal has truly been a simple one—to serve and to train servants for God. As an institution, we have not been a participant in the “religious politics” of our day, nor been under the control of any denominational group or leader. As a result, we have experienced the freedom to follow the will and direction of God to the best of our ability. We marvel at God’s unusual goodness in raising up this campus where young people who want to **serve** God can receive an excellent Christian college education.

When you visit PCC, you will sense the effects of a servant’s heart, genuine friendliness, spiritual vibrancy, and a heart for missions. PCC faculty are approachable, helpful, and singularly dedicated to the task of teaching as unto God. Being a “servant of Christ” sums up the personality of Pensacola Christian College.

Do we believe in leadership? Certainly. It is one of the natural consequences of being a servant, but to lead effectively, one must first learn to serve. At PCC, we stress “dedicated to excellence and committed to service.” I invite you to visit the campus and see for yourself. You won’t be disappointed.

Missions Conference 08

In opening message, Campus Church pastor Dr. Neal Jackson challenged audience with Jesus' final words on earth —

"Go Ye"

Go Ye—the 2008 Missions Conference theme echoed through the Crowne Centre as 250 international students in native dress marched in the Parade of Nations. The national flags they bore reminded the audience that millions around the world need to hear about Christ. Many watched through tear-filled eyes.

Speakers, Dr. David Pittman and Dr. James Ray, told about those won to Christ and challenged the audience to consider the Christian's call to missions. Dr. Pittman, pastor, is actively involved in missions. His son Jeremy (PCC grad) is a missionary in Uganda, Africa. Dr. James Ray, former

pastor, helped establish churches in Australia and England, and is president/general director of Baptist International Missions, Inc. (BIMI), which represents over 1,000 missionaries in 90 countries.

PCC students heard the heart for missions as 13 mission board representatives and 32 missionaries spoke in College chapel and classes, taught Sunday school, met with students, and counseled before and after services. Hearts were stirred by visual presentations showing the need for more laborers in the field. Many answered the call to missions to join PCC's 101 missions majors preparing to "go into all the world." ■

PCC Accounting Majors... CRUNCHING NUMBERS

“Accounting is more than a boring desk job—it’s an opportunity to bring efficiency, profitability, and information to a business,” said **Chris Anteau** (*’96 grad*).

Chris works for Copper State Communications based in Tuscon, AZ. As Controller, he oversees accounting, administration, finance, and human resources. Within two years of graduating, Chris moved into a managerial position. He said, “I found that my co-workers knew little about accounting theory, which I learned at PCC. I learned why we do what we do, not simply how to do it. With an accounting major, you can go into almost any industry and do almost anything that interests you.”

Chris also found PCC’s training prepared him for graduate school. He said, “When I started graduate school in 2003, I found I had already learned most of the material in PCC’s undergraduate program. That was not the case for many of the other students. Their undergraduate programs did nothing to prepare them for graduate school.”

PCC’s accounting program provides a foundation in understanding cash, accounts receivable, inventories, investments, cash flow, and related basic accounting issues. Students learn to analyze costs, become proficient in working with financial investments, study individual/corporate taxation, and use computer-based accounting.

Students select accounting courses for their area of interest, which could be starting a business, working in corporations, or serving in a Christian ministry. They can choose advanced courses that cover government/not-for-profit accounting, auditing, cost accounting, and partnership/corporate taxation.

PCC’s accounting program teaches a conservative approach to investing and financial planning, which is essential to entrepreneurial and corporate success. Conservative financial/accounting principles prepare students to manage small or large businesses. PCC accounting graduates are prepared to continue their studies in graduate school or take the CPA exam after meeting their state’s requirements.

“With an accounting major, you can go into almost any industry and do almost anything that interests you.”

—PCC Alumnus

Brad Fralic ('89 grad) is a senior manager at Skoda Minotti, a professional services firm located near Cleveland, OH. His daily

responsibilities include training and mentoring younger staff, acquiring new clients, and providing services to existing clients. Those services include evaluating the finances and operations of companies being considered for purchase—he works for the potential acquirer in these cases. Brad recently worked on a potential acquisition by a private equity firm, but the deal fell through when he discovered that the target company would owe the IRS more than \$1 million in back taxes, penalties, and interest.

Brad said, "PCC gave me knowledge for the work I do every day—many times I've gone to the company white board and drawn out T-accounts to help younger staff work through a more complex accounting question. PCC provided me a solid base of accounting knowledge, reinforced my Christian values and walk, and was a 'fun' environment in which to learn."

PCC's accounting program offers a wide range of instruction to prepare students for the accounting field. ■

exhort
with all
longsuffering
and doctrine.

II Timothy 4:2

Scheduled for FALL '08!

Anticipation spreads as construction progresses on PCC's Sports Center Annex. Scheduled for fall '08, PCC's newest facility will offer exciting activities rarely available on a college campus.

- Double Flow Rider® indoor surfing wave
- Water park with 3 water slides
- 40' & 60' climbing walls & 12' boulder
- In-line skating track

Complete with **fitness rooms**, **racquetball courts**, and rooftop **sun deck** for women students, PCC's Sports Center Annex is causing excitement.

Computer Science at PCC ▶

Interested in technology? Begin training at PCC for the ever-changing field of computer science.

What Majors Are Offered?

▶ Computer Information Systems

Gives a general background in practical computer skills with an emphasis in business programming. Through hands-on experience, students gain programming skills in several languages to enter the job market or graduate school. Project classes develop students' productivity and teamwork skills in developing large-scale software applications.

▶ Computer Science & Software Engineering

Provides an in-depth study into the software development process, giving experience in more complex computer topics. In addition to preparing for the job market, students are also ready for graduate study and further research.

▶ Minors

- Business Technology
- Computer Information Systems
- e-Business Management

What Classes Will You Take?

▶ Programming Languages

C, C++, COBOL, Java®, .NET®, and Visual Basic®

▶ Internet Programming

ASP.NET, CGI, CSS, DHTML, Javascript, PHP, XHTML, and XML

▶ Database Design and Programming

Access®, MySQL, Oracle, and SQL Server®

▶ Networking

FTP, HTTP, SMTP, TCP/IP, and other protocol standards

▶ Software Engineering

Designing and managing software and the software development process

▶ Computer Architecture & Hardware

The interaction of computer components to learn how computers truly work; build and troubleshoot Intel and AMD systems

▶ Group Projects

Large-scale design, construction, testing, and implementation of real-world programming applications

What Resources Are Available?

Five PCC computer labs provide students with more than 180 desktop computers. Wireless internet access is available in residence halls and select buildings on campus.

What Careers Will You Be Prepared For?

- Computer Programmer
- Web Designer/Web Administrator
- Software System Analyst, Designer, Engineer, or Tester
- Computer Programmer
- Network Programmer/Administrator
- Database Administrator
- Internet Programmer/Manager
- Computer Consultant
- Computer Hardware Technician
- Certifications such as A+, MCSE, and Oracle
- Graduate School

▼ Computer science faculty Bryan Halsey helps student develop small business computer application.

Graduates in the Field

PCC computer science graduates work for major companies such as—Motorola, Delta Airlines, Lockheed Martin, Merck, Merrill Lynch, and many more. Grads also serve in various Christian ministries.

Lennart Wong ('97) is software design engineer for Microsoft Corporation. He said, "Computer technology is very diverse and constantly changes.

Back when I first started at Microsoft, I felt I knew nothing. However, all computer technologies derive from certain fundamental computer science principles. This is exactly how PCC prepared me. The principles I learned in PCC's computer science program have given me the power to learn new technologies speedily. In addition, PCC helped strengthen my work ethic and personal integrity, which are two things valued highly by corporations such as Microsoft. Computer science is a great major to have.

"If you like this major, you will have a blast for the rest of your life. It is challenging, but very exciting because you will experience new things all the time!"

Dave Smith ('91) worked 7 years for a South Carolina software company; then he and his wife were called to Papua New

Guinea as missionaries. He said, "The computer science program taught me excellence in all I do, whether in business or ministry. Although I am no longer working in the computer industry, I use my computer skills almost every day on the mission field. I prepare lessons and classes to edify our church leaders. I use my computer to generate tools for evangelism, spreadsheets for financial integrity, PowerPoint® presentations for teaching, video presentations for furlough, and I also designed our ministry Web site. I am very thankful for the computer skills and training I received at PCC—they have helped me tremendously as a missionary."

Alumni Testimonies

"I am extremely thankful that I met my wife at PCC. We continue to thank God that the dating standards at PCC forced us to communicate. We shared our hearts and goals, our vision for ministry and family. We knew before marriage that we shared the same desire for service in ministry. Taking the emphasis off the physical helped us really get to know each other. We thank the Lord regularly that we saved ourselves for each other in marriage. Thank you for creating a godly environment for Christian young people to meet each other. This is a heritage we will pass on to our children.

"I have found it easy to express the goals of the ministry this way—

PCC has a heart to win people to Christ.

PCC has a desire to train servants for ministry.

PCC creates an environment where students and faculty/staff can pillow their heads at night with a clear conscience."

—'89 Grad

"As a PCC graduate beginning medical school at one of America's premiere Ivy League universities, I can attest that PCC's premed program provides rigorous preparation for entrance into medical school. The course work incrementally develops students' critical thinking and problem-solving skills. PCC is far more than merely academics, however. The college provides a world-class education in an environment of conservative, Bible-believing Christianity. The fact that PCC combines opportunities for spiritual and educational growth made it the school of my choice."

—'02 Grad

Start Early

PCC's Dual Enrollment Program

Finish your Senior year of high school... ...start college at the same time!

Would you like to save time and money by starting college early? This opportunity is available through PCC's Dual Enrollment Program.

Dual Enrollment is a program for high school seniors to earn college credits while completing high school requirements. You can attend PCC classes that earn dual credits at both Pensacola Christian Academy and Pensacola Christian College. In as little as one year, you can graduate with a Pensacola Christian Academy high school diploma and earn credits that apply toward Pensacola Christian College degree requirements.

Dual Enrollment expands your high school elective choices to a variety of college classes more challenging than those currently available to you. You will also have access to PCC's academic resources, laboratories, and recreational facilities.

Dual Enrollment Advantages:

- Savings of time and money
- Expanded choice of elective classes
- Access to college-level resources, facilities, and faculty
- A head start on your college career!

SUMMER CAMPS '08

for Grades 9–12 and class of 2008

NEW!

Girls' Basketball Camp

July 21–25

Strengthen skills in

- ball handling
- defense
- rebounding
- offense
- team building
- compete in actual games

Summer Music Academy

July 7–19

Improve musical talent and build confidence through

- intensive daily teaching
- practice in college facilities
- supervision and encouragement
- concert and Honors Recital

Engineering/Science Camp

June 16–20

Explore God's handiwork in nature

- Hands-on experience in college labs
- Great ideas for science fair projects
- Exciting competitions

Speech/Drama Camp

July 7–19

Gain practical hands-on experience in

- performance techniques
- technical aspects of production
- proper voice use in public speaking
- production practices and backstage processes

Computer Science Camp

June 23–27

Learn the basics of

- Web page construction
- writing Internet applications
- programming languages
- network programming techniques

Art Camp

July 14–18

Sharpen skills and techniques in

- drawing & design fundamentals
- digital graphics
- daily drawing exercises
- practical studies

History/Political Science Camp

June 9–13

Connect with your historical roots

- Learn more about America's "faith heritage"
- Experience the "Historical Mono-Drama" series

Nursing Camp

July 7–11 • July 14–18

- Hands-on experience in a fully equipped nursing lab
- Training in CPR and basic first aid
- Gain insight from practicing nurses

Basketball Camp

Boys

June 9–13 • June 23–27

June 16–20 (team week)

Strengthen skills in

- ball handling
- defense
- rebounding
- offense
- team building

Pre-Medicine Camp

June 9–13

- Hands-on experience in college labs
- Participate in animal dissection

Volleyball Camp

Girls

July 7–11

July 14–18 (team week)

- Improve basic skills
- Analyze abilities/smooth out problem areas
- Practice teamwork
- Fellowship with players from around the country

Elementary Education Camp

June 16–20

Learn the "tricks of the trade"

- Create dynamic visual aids
- Practice teaching a Bible story
- Apply technology to the classroom

Cheerleading Camp

Girls

July 21–25

Senior High and Junior High

(minimum age 11/grade 6)

Instruction and practice in

- new cheers and stunts
- techniques and teamwork
- ideas for fundraising & pep rallies
